AI OUTREACH PRODUCT / CUSTOMER JOURNEY / 2026 · Work sample, genericized: product name and internal feature names removed for portfolio use

YOUR MARKET, MADE SEARCHABLE.

FIND → REACH → BOOK

PRIMARY JOURNEY

Early-stage founder or operator handling sales, recruiting, partnerships, or fundraising without a large GTM team.

	01 NEED ARISES	02 MANUAL SEARCH	03 FINDS THE PRODUCT	04 SEARCH + REFINE	05 OUTREACH + ACTION	06 OUTCOME + REPEAT
CUSTOMER GOAL	Find a buyer, hire, partner, or investor.	Build a credible target list.	Decide if the product can solve the need.	Produce a relevant, defensible list.	Turn targets into qualified conversations.	Book meetings; repeat for the next need.
ACTIONS	Defines who could unlock the next step.	Searches LinkedIn, contacts, and communities.	Scans a use case; chooses **Run a search.**	Describes, reviews evidence, rejects, refines.	Reviews drafts; approves; sends and tracks.	Handles replies; meets; starts another search.
TOUCH-POINTS	Team · inbox · calendar · network	LinkedIn · email · sheets · Slack	Website · referral · LinkedIn · pilot proof	Query · results · source links · alerts	Draft review · inbox · send · calendar	Replies · meetings · alerts · workspace
THINKING	"I need the right person now."	"This is taking too long."	"Can it find people I'd miss?"	"I can see why each result is here."	"This sounds specific, not templated."	"That was an opportunity I'd have missed."
EMOTION	●**Pressured**	●**Frustrated**	●**Curious**	●**Hopeful**	●**Anticipating**	●**Empowered**
FRICTION	Urgent need; unclear target.	Fragmented sources, stale data, bad timing.	Trust, privacy, list quality — "another prospecting tool?"	Query ambiguity, false positives, setup effort.	Spam risk, generic copy, loss of control.	Maintain quality; prove recurring ROI.
THE PRODUCT'S ROLE	Detect relevant moments using real-time buying signals.	Replace scattered research with one plain-English search.	Unify people, companies, signals, and relationship paths.	Find and enrich; show sources; refine by rejecting.	Draft from context; human review; send from inbox.	Deliver qualified replies and meetings; loop back to the start.
OPPOR-TUNITY / GTM ACTION	**Lead with four urgent use cases and trigger moments.**	**Show the manual-vs-product workflow and receipts.**	**Use pilot proof, two-minute setup, and source transparency.**	**Guide the first query; provide prompts; speed first value.**	**Demonstrate two sentences, one ask, human approval.**	**Report outcomes; prompt next search; expand use cases.**

SEARCH → SIGNAL DETECTION → OUTREACH
